For Home Networkers

Only a central storage makes a network useful. The ICY BOX IB-NAS5220 is a secure storage and it offers various server functions. It works in Windows networks as well as in Mac or Linux networks. Remote access is made possible by the FTP server.

Thanks to the printer server you will need only one printer in the entire network. For your entertainment there are the BitTorrent client and the Twonky Media Server (30 days free test-version). As the ICY BOX is space for two HDDs you can enhance the security in the RAID 1 mode.
